

Avaneesh Bukenkere

ava33sh@gmail.com — github.com/Bukenkere24 — linkedin.com/in/avaneesh-g-b — Bengaluru, Karnataka

Objective

Aspiring Computer Science Engineer with a strong foundation in software development and applied machine learning. Passionate about building scalable systems, automation workflows, and real-world ML applications.

Technical Skills

- **Languages:** Python, Java, C, SQL, R
- **Libraries:** NumPy, Pandas, Scikit-learn, Matplotlib, NLTK, Flask, OpenCV
- **Tools:** Git, MySQL, Jupyter, PyCharm, Salesforce (Flows, Apex)
- **Other:** ETL pipelines, automation, unit testing

Experience

Intern — Aedon.Accounting (Remote) Oct 2025 – Mar 2026

- Successfully created an automated Opportunity Forecasting flow in Salesforce that transformed revenue prediction capabilities.
- Enhanced data accuracy, resulting in a more reliable sales forecasting process.
- Streamlined workflows by collaborating with cross-functional teams to implement effective forecasting strategies.
- Developed strong skills in Salesforce automation, Apex programming fundamentals, data analysis, and cross-functional collaboration.

AI Intern — Beagle.ai (Remote) Jan 2026 – Present

- Worked on AI-driven software solutions involving workflow automation, backend integrations, and production-level implementations.
- Built Python-based tools to automate processes and improve operational efficiency.
- Contributed to scalable systems integrating APIs, data pipelines, and intelligent automation workflows.
- Involved in development lifecycle including implementation, debugging, testing, and deployment.

Winner — Quant Problem Nitte Hackathon Nov 22, 2025

- Achieved 1st place for designing a quantitative optimisation model using Python, NumPy and Pandas.
- Built a robust demo and presented strategy generation, evaluation pipeline, and insights to judges.

Projects

Vega Physiotherapy Website

- Built an end-to-end professional business website as a client contract project for Vega Physiotherapy.
- Developed responsive UI, service pages, and contact workflows with a focus on usability and design.
- Delivered successfully with team collaboration as part of Anveshan tech fest sponsorship partnership.

Computer Vision Project

- Developed a computer vision application using Python and OpenCV for image/video processing tasks.
- Implemented preprocessing, feature extraction, and detection/classification pipelines.
- Designed efficient workflows for real-time and batch processing scenarios.

Stock Market Trend Predictor

- Developed a Random Forest model using feature engineering with historical stock market data.
- Evaluated predictive performance using back-testing methodologies and trend analysis.

- Applied data preprocessing and model tuning to improve forecasting reliability.

AI Chatbot with NLTK

- Built an NLP-based chatbot using NLTK with regex-based intent mapping, fallback flows, and multi-intent support.

Education

JSS Academy of Technical Education

Sep 2023 – Sep 2027

B.E. Computer Science, GPA: 8.2/10

RVPU College

Completed: July 2023

Pre-University (PCMB)

Certifications

- IBM: Artificial Intelligence Fundamentals
- IBM: Cybersecurity Fundamentals
- HackerRank: SQL (Advanced)
- Infosys Springboard: NLP using Python
- Python Institute: PCEP

Extracurricular Activities

- Editing team — Branch newsletter; Event organiser for Anveshan tech fest.
- Pianist (Trinity College Grade 1).
